Bring this **letter of introduction** with you to Canada. It has information that may be used by the Canada Border Services Agency to issue your work permit

Pierre TAKLA

500-1190 avenue des Canadiens-de-Montréal, C/o Far
rell LLP Attn: Elizabeth Hazboun
Montréal QC H3B 0M7
Canada

Dear Pierre TAKLA,

Your application to work in Canada has been initially approved by Immigration, Refugees and Citizenship Canada. The **final decision to issue you a work permit and allow you to enter Canada** is made after an examination by an officer in Canada. At that time, an officer will assess **if you still meet the requirements** of the *Immigration and Refugee Protection Act*, its Regulations and any other Canadian legislation.

Type: Permit - WP / Permis - PT

Document number: U513650089

Letter of Introduction validity (YYYY/MM/DD): 2025/04/08

Medical Examination validity (YYYY/MM/DD): N/A

Documents you must bring with you to get your work permit:

- a valid passport or travel document.
 - Your work permit won't be valid beyond your passport's expiry date.
- a valid temporary resident (visitor) visa (TRV) or Electronic Travel Authorization (eTA), if required.
 - Your eTA is valid for multiple visits to Canada, until 2027/04/07 . Your eTA number is J515766033 and is linked to the passport you used when you applied to work in Canada. If you obtain a new passport before 2027/04/07 , you will need to apply for a new eTA by visiting www.canada.ca/eTA.

- o United States citizens are not required to obtain an eTA or TRV. However, you must provide proof of your status in the United States on entry to Canada. For this reason, it is strongly recommended that you present a valid United States passport or valid United States Permanent Resident Card on entry to Canada.
- [Other supporting documents](#), such as proof that you meet the requirements of the job.

As you gather your documents, be aware that:

- **This letter does not authorize you to enter, remain or work in Canada.** A border services officer will make that decision when you arrive in Canada.
- **This letter is not a passport or travel document.** You will not be allowed to board your flight without your passport, even if you have this letter with you.
- **Do not pack these or other valuable papers in your checked luggage.** Find out more about which documents you will need to bring with you by visiting: **Work permit: Prepare for arrival** (<https://www.canada.ca/en/immigration-refugees-citizenship/services/work-canada/permit/temporary/prepare-arrival.html>).

Immigration medical examination: You must have a valid [immigration medical examination](#) (IME) (<https://www.canada.ca/en/immigration-refugees-citizenship/services/application/medical-police/medical-exams/requirements-temporary-residents.html>), if required. Your IME must be [valid](#) on the day you arrive at the port of entry or you may be found inadmissible.

Health insurance: Temporary workers are only eligible for public health insurance in some provinces or territories. Make sure that you and any dependants coming with you to Canada have **either** adequate health care insurance or enough money in case you need medical attention.

Know your rights: Please be aware that workers are protected by labour and employment laws. You are entitled to a safe workplace where your health is protected. If you experience abuse in your job in Canada, you may be eligible for an [open work permit for vulnerable workers](#).

IMPORTANT INFORMATION: Please carefully review the information on [Work permit: When you start working](#) (<https://www.canada.ca/en/immigration-refugees-citizenship/services/work-canada/permit/temporary/start-working.html>) web page to ensure that you know and understand your obligations and rights in Canada.

**Global Skills Strategy
Two Weeks Priority Processing**

Immigration Refugees and Citizenship Canada

Canadian Embassy in France
130, rue du Faubourg Saint-Honoré
75008 Paris
France

Dear Sir or Madam:

Re: **TAKLA, Pierre – D/C.O.B.: April 30, 1989 / France**
Application for a Canadian Work Permit - Reciprocal Employment
Regulation R205(b), LMIA Confirmation Exemption Code C20
Essential worker

A number:	A0658201
Job title:	Software Developer (NOC 2173)
Employer:	Google Canada Corporation
Location:	Montreal, QC, Canada
Duration:	Three (3) Years
Remarks:	Authorized to work at Google offices across Canada

Accompany Spouse:	SALABELLE-TAKLA, Marie Emmanuelle Francoise
D/C.O.B:	January 26, 1991
Request:	Open Spousal Work. Eligible to work in a healthcare
Duration	Three (3) Years

We have been retained by Google Canada Corporation (hereinafter "Google Canada") to assist Mr. Pierre Takla (hereinafter "Mr. Takla") with obtaining a Canadian work permit.

Please note: This applicant is eligible for two weeks priority processing as:

1. Mr. Takla is applying for this work permit from outside of Canada;
2. Mr. Takla has an employer-specific job offer in a NOC "A" position;
3. Google Canada has submitted an offer of employment using the Employer Portal and paid the employer compliance fee; and

4. The biometrics fee of \$170 has been paid on behalf of Mr. Takla and his spouse.

Coronavirus disease (COVID-19) Travel Information: Essential Services to Canada

We attach a copy of the Government of Canada Guidance on Essential Services and Functions in Canada. During the COVID-19 Pandemic, which highlights the Information and Communication Technologies sector as one of the ten critical infrastructure sectors in Canada during this Pandemic. Google Canada is in a “critical infrastructure industry” that is permitted and obligated to provide critical and essential services at this time. Accordingly, Google Canada has a responsibility to continue its business operations and activities due to its designation as an “essential services” across Canada. In particular, Mr. Takla will be engaged in the critical services of specialized software engineering services as indicated within this guidance.

About Google

Google is a global technology leader, focused on improving ways that people connect with information. Google’s innovations in web search and advertising have made their website a top Internet property and their brand one of the most recognized in the world. Google has more than 70 offices in more than 40 countries around the globe. For more information, please visit www.google.ca.

Google’s Mobility Program

Each year, hundreds of Googlers will rotate to new teams. Google offers its employees experiential rotational career development opportunities in different roles, functions and/or geographies. They will apply their skills to grow Google’s business, and in turn develop new skills and experiences to propel their careers forward.

With more than 70 offices in over 50 countries around the world, including but not limited to Canada, United States, Brazil, Mexico, United Kingdom, Germany, India, China, South Africa, Google’s mobility practice is robust and multifaceted. Google offers employees rewarding and wide-ranging experiences and opportunities to pursue their passion. Google’s global mobility objectives aim to afford employees the ability to share knowledge and best practices between their locations. Google takes pride in hiring incredibly talented people who grow with Google. Google wants all Googlers to feel supported and encouraged to develop challenging and fulfilling careers.

Google has a history of transferring professionals to their various locations worldwide to provide their employees with training and international experience.

For more information regarding Google’s mobility program, please refer to the enclosed support letter.

The Position in Canada

Mr. Takla has been offered a three-year employment opportunity in Montreal, QC in the role of Software Developer starting from April 1, 2022. In completion of his duties, Mr. Takla will be required to travel from time to time. **As such, we are requesting that he be authorized to work at Google offices across Canada.**

For more information about Mr. Takla’s terms of employment, duties, and qualifications, please refer to the enclosed support letter from Google Canada and Mr. Takla’s resume.

Eligibility and Submission

It is our submission that Mr. Takla qualifies for a work permit under LMIA exemption code C20 - Reciprocal Employment category, based on the following:

1. This is a temporary position for a duration of three (3) years;
2. It will not affect the Canadian labour market;

3. Google offers similar opportunities to its Canadian employees;
4. For his service, Mr. Takla will be remunerated with a salary that is consistent with his skill level and experience; and
5. Mr. Takla will comply with all immigration requirements for temporary entry and will depart Canada at the end of the period authorized for his stay.

Mr. Takla's spouse, Ms. Marie Emmanuelle Francoise Salabelle-Takla (hereinafter "Ms. Salabelle-Takla") will accompany him to Canada. Given that Mr. Takla is a temporary foreign worker in a skill level "A" occupation, we respectfully submit that his spouse, Ms. Salabelle-Takla is eligible for an open spousal work permit pursuant to IRPR 205(c); LMIA exemption code C41. We request that Ms. Salabelle-Takla be issued an open Work Permit.

We respectfully request that Ms. Salabelle-Takla be able to work in a health-related field. Enclosed is a copy of her eMedical information sheet

Mr. Takla and Ms. Salabelle-Takla's two minor children, Raphael Matthieu Victor Takla and Timothee Gabriel Jacques Takla, will also be accompanying them to Canada. As the minor children are French citizens, they are visa-exempt and will be requesting for a Visitor Record upon entry into Canada.

Enclosures

In support of this application, we have enclosed the following:

1. Both applicants' work permit, spouse's open work permit processing, and biometrics fees in the amount of \$580;
2. Both applicants' validated *Application for Work Permit Made Outside of Canada* (IMM1295);
3. Both applicants' addendum to IMM1295;
4. Both applicants' duly signed *Use of a Representative* form (IMM5476);
5. Both applicants' duly signed *Family Information* form (IMM5707);
6. Evidence of submitting the Offer of Employment to a Foreign National Exempt from a Labour Market Impact Assessment through the Employer's Portal including the issued Offer of Employment Number (A0658201)
7. Copy of employer compliance fee receipt \$230;
8. Copy of Google Canada Support letter and Global Mobility information;
9. Copy of both applicants' passport biodata page, visa and stamped pages;
10. Copy of applicant's resume and educational credentials;
11. Copy of applicant's financial documents;
12. Copy of marriage certificate; and
13. Both applicants' digital photo as per photo specifications.

Thank you in advance for your assistance in this matter. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

Yours truly,

Yours truly,

Farrell LLP

February 3, 2022

Dear Sir or Madam:

This is to verify that Mr. Pierre Takla will commence the employment at Google Canada in the position of Software Developer, starting from April 1, 2022.

In accordance with guidance issued by Public Safety Canada and Canada's National Strategy for Critical Infrastructure, Google Canada Corporation ("Google") is in a "critical infrastructure industry" that is permitted and obligated to provide critical and essential services at this time. Accordingly, Google has a responsibility to continue its business operations and activities due to its designation as an "essential services" based on the guidance issued by Public Safety Canada.

If verification of this request is required, please call the undersigned, or our solicitor in this matter, Ms. Elizabeth Hazboun, at Farrell LLP in Montreal, Quebec, via phone: (514) 390-2131, or via e-mail: ehazboun@dgilaw.com.

Yours truly,

A handwritten signature in blue ink, appearing to read "Jill Murdock". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Guidance on Essential Services and Functions in Canada During the COVID-19 Pandemic

Note:

Workers performing duties in an essential service or function identified in this document are not automatically exempt from the Emergency Orders made under the Quarantine Act. These Emergency Orders prohibit entry of foreign nationals into Canada and require anyone entering Canada to isolate or quarantine for 14 days. Individuals are only exempt if they qualify for one of the specific exemptions in the Orders or the associated Group Exemptions.

The Orders and associated Group Exemptions are found at the following link: <https://www.canada.ca/en/public-health/corporate/mandate/about-agency/acts-regulations/list-acts-regulations.html> (<https://www.canada.ca/en/public-health/corporate/mandate/about-agency/acts-regulations/list-acts-regulations.html>).

Canada's [National Strategy for Critical Infrastructure \(/cnt/rsrscs/pblctns/srtg-crtcl-nfrstrctr/index-en.aspx\)](#) defines critical infrastructure as the processes, systems, facilities, technologies, networks, assets, and services essential to the health, safety, security or economic well-being of Canadians and the effective functioning of government. The Strategy classifies critical infrastructure in Canada according to ten sectors:

- Energy and Utilities
- Information and Communication Technologies
- Finance
- Health
- Food
- Water
- Transportation
- Safety
- Government
- Manufacturing

A number of jurisdictions within Canada have announced that business closures and border measures are in effect. Provincial and territorial announcements have highlighted that only organizations necessary to provide “essential services” are permitted to operate.

Public Safety Canada has developed a set of functions deemed essential in the context of the COVID-19 pandemic to help provinces/territories, Indigenous communities, and municipalities protect their communities while maintaining the reliable operation of critical infrastructure services and functions to ensure the health, safety, and economic well-being of the population. These services and functions can also help the private sector self-identify as essential.

These services and functions are considered essential to preserving life, health and basic societal functioning. These include, but are not limited to, the functions performed by first responders, health care workers, critical infrastructure workers (e.g., hydro and natural gas), and workers who are essential to supply critical goods such as food and medicines. Workers who deliver essential services and functions should continue to do their jobs provided they have no symptoms of COVID-19 disease. Employers of these workers should take all possible steps to protect their health and safety by implementing practices and procedures recommended by public health authorities and providing appropriate protective equipment and products. Further, workers who can perform their tasks remotely should do so.

Municipal, provincial, territorial or Indigenous jurisdictions have the legislative authority to implement and execute response actions within their jurisdictions, while Public Safety Canada has a key role to play to facilitate and enable critical infrastructure security and resilience.

As many organizations are determining what services and functions are essential to the continuity of operations and incident response, Public Safety Canada has compiled a non-exhaustive list of essential services and functions to support this effort and assist in enabling the movement of critical infrastructure workers within and between jurisdictions. These essential services and functions are advisory in nature. This guidance is not, nor should it be considered to be a federal directive or standard.

This set of essential services and functions (Annex A) was developed in consultation with industry representatives. Public Safety Canada will continually consult on, and amend the list as events unfold. For specific questions and guidance on essential services and functions, please contact the appropriate authorities in your respective jurisdiction.

Annex A: Essential Services and Functions by Critical Infrastructure Sector

Health

- Workers providing COVID-19 testing
- Workers that perform critical clinical research needed for COVID-19 response
- Caregivers (e.g., physicians, dentists, psychologists, mid-level practitioners, nurses and assistants, infection control and quality assurance personnel, pharmacists, physical and occupational therapists and assistants, social workers, counsellors, speech pathologists and diagnostic and therapeutic technicians and technologists)
- Hospital and laboratory personnel (including accounting, administrative, admitting and discharge, engineering, epidemiological, source organs, plasma and blood donation, food service, housekeeping, medical records, information technology and operational technology, nutritionists, sanitarians, respiratory therapists, etc.)
- Workers in other medical facilities (including ambulatory health and surgical, blood banks, clinics, community mental health, comprehensive outpatient rehabilitation, end stage renal disease, health departments, home health care, hospices, hospitals, long term care, procurement organizations, psychiatric facilities, and rural health clinics)
- Manufacturers, technicians, logistics and warehouse operators, and distributors of medical equipment, medical devices, personal protective equipment (PPE), medical gases, medical isotopes, pharmaceuticals and other health products, blood and blood products, vaccines, testing materials, cannabis for medical purposes, laboratory supplies, cleaning, sanitizing, disinfecting or sterilization supplies, tissue and paper towel products, and safety gear/clothing
- Public health/community health workers, including those who compile, model, analyze and communicate public health information
- Blood and plasma donors and the employees of the organizations that operate and manage related activities
- Workers that manage health plans, billing, and health information, who cannot practically work remotely
- Workers who conduct public health functions, conducting epidemiologic surveillance, compiling, analyzing and communicating public health information, who cannot practically work remotely
- Workers performing cybersecurity functions at healthcare and public health facilities, who cannot practically work remotely
- Workers performing security, incident management, and emergency operations functions at or on behalf of healthcare entities, who cannot practically work remotely
- Workers who support food, shelter, and social services, addictions treatment and outreach, supervised consumption sites and other necessities of life for economically disadvantaged or otherwise needy individuals, such as those residing in shelters or children in care
- Pharmacy employees
- Workers performing mortuary services, including funeral homes, crematoriums, and cemetery workers
- Workers who coordinate with other organizations to ensure the proper recovery, handling, identification, transportation, tracking, storage, and disposal of human remains and personal effects; certify cause of death; and facilitate access to mental/behavioral health services to the family members, responders, and survivors of an incident
- Health care professionals providing emergency care including dentists optometrists and physio-therapists
- Workers that provide critical personal support services in home and also provide residential services for individuals with disabilities, including those who maintain equipment for those with disabilities
- Workers required to carry out construction and restoration projects and services associated with the health sector, including new facilities, expansions, renovations and conversions of spaces that could be repurposed for health care space

Water

- Employees and others needed to operate and maintain drinking water and wastewater/drainage infrastructure
- Employees needed to maintain and test water quality

- Workers required to carry out construction and restoration projects and services associated with the water sector, including building and commissioning water and wastewater systems and supporting the health and safety of users of the system

Food

- Workers supporting groceries, pharmacies and other outlets (such as convenience and pet food stores) that sells food and beverage products
- Restaurant employees necessary to support take-out and food delivery operations
- Food manufacturer employees and their supplier employees—to include those employed in food processing (packers, meat processing, fish processing, cheese plants, milk plants, produce, etc.) facilities; livestock, poultry, fish and seafood, slaughter facilities; pet and animal feed processing facilities; human food facilities producing by-products for animal food; beverage production facilities; and the production of food packaging
- Workers including those employed in animal food, feed, by-product and ingredient production, processing, packaging, and distribution; manufacturing, packaging, and distribution of veterinary drugs; truck delivery and transport; farm and fishery labor needed to harvest and produce our food supply domestically
- Agriculture and aquaculture workers and support service workers including those necessary for the growing, harvesting and processing of field crops (e.g., wheat, soybean, corn, hay, etc.); those responsible for fuel ethanol facilities, biodiesel facilities, renewable heating oil facilities, storage facilities, and other agricultural inputs
- Workers undertaking traditional harvesting activities, including fishing, hunting and agricultural activities
- Employees and firms supporting food, feed, and beverage distribution, including warehouse workers, vendor-managed inventory controllers
- Workers supporting the sanitation of all food manufacturing processes and operations from wholesale to retail
- Company in-house cafeterias used to feed employees
- Workers in food testing labs and those working in food safety (such as third-party food safety auditors)
- Employees of companies engaged in the production of chemicals, medicines, vaccines, and other substances used by the food and agriculture industry, including pesticides, herbicides, fertilizers, minerals, enrichments, and other agricultural production aids
- Animal agriculture workers to include those employed in veterinary health; manufacturing and distribution of animal medical materials, animal vaccines, animal drugs, feed ingredients, feed, animal nutrition consultation and bedding, etc.; transportation of live animals, animal medical materials; transportation of deceased animals for disposal; raising of animals for food; animal production operations; slaughter and packing plants and associated regulatory and government workforce, including provincial, territorial and federal inspectors
- Employees engaged in the manufacture and maintenance of equipment and other infrastructure necessary to agricultural, aquaculture, and fishery production and distribution

Information and Communication Technologies

Communications

- Maintenance of communications infrastructure (wireline, wireless, internet, broadcast, satellite, news), including privately owned and maintained communication systems and/or networks supported by sub-contractors. technicians, operators, call-centres, wireline and wireless providers, cable service providers, satellite operations, undersea cable landing stations, Internet Exchange Points, and manufacturers and distributors of communications equipment and services
- Workers who support radio, television, and media service, including, but not limited to front line news reporters, studio, and technicians for news gathering and reporting
- Workers at independent system operators and regional transmission organizations, and network operations staff, engineers and/or technicians to manage the network or operate facilities
- Workers required to carry out construction and restoration projects and services associated with the communications sector, including engineering of fibre optic cables and wireless sites
- Installation, maintenance and repair technicians that establish, support or repair service as needed, including in critical consumer facing stores
- Central office personnel to maintain and operate central office, data centres, and other network office facilities
- Customer service and support staff, including managed and professional services as well as remote providers of support to transitioning employees to set up and maintain home offices, who interface with customers to manage or support service environments and security issues, including payroll, billing, fraud, and troubleshooting
- Dispatchers involved with service repair, restoration, supply chain operations

- Critical corporate support functions such as human resources, payroll, communications, security, finance, procurement, and real estate operations that support the customer and internal company networks

Information Technology

- Workers who support command centres, including, but not limited to network operations command centres, broadcast operations control centres and security operations command centres
- Data centre operators, including system administrators, HVAC and electrical engineers, security personnel, IT managers, data transfer solutions engineers, software and hardware engineers, and database administrators
- Client service centres, field engineers, and other technicians supporting critical infrastructure, as well as manufacturers and supply chain vendors that provide hardware and software, and information technology equipment and services (to include microelectronics and semiconductors) for critical infrastructure
- Workers responding to cyber incidents involving critical infrastructure, including medical facilities, governments and federal facilities, energy and utilities, and banks and financial institutions, and other critical infrastructure assets and personnel
- Workers supporting the provision of essential global, national and local infrastructure for computing services (incl. cloud computing services), business infrastructure, web-based services, and critical manufacturing
- Workers supporting communications systems and information technology used by critical infrastructure stakeholders
- Critical corporate support functions such as human resources, payroll, communications, security, finance, procurement, and real estate operations that support the customer and internal company networks

Energy and Utilities

Electricity industry

- Workers who maintain, ensure, or restore the generation, transmission, and distribution of electric power, including call centres, utility workers, reliability engineers and fleet maintenance technicians
- Workers required to carry out construction and restoration projects and services associated with the electricity sector, including for the generation, transmission and distribution of electricity power
- Workers needed for safe and secure operations at nuclear generation
- Workers at generation, transmission, and electric black start facilities
- Workers at needed for operations at independent system operators, regional transmission organizations, and balancing authorities
- IT and OT technology staff – for EMS (Energy Management Systems) and Supervisory Control and Data Acquisition (SCADA) systems, and utility data centres; cybersecurity engineers; cybersecurity risk management
- Vegetation management crews and traffic workers who support
- Environmental remediation/monitoring technicians
- Instrumentation, protection, and control technicians
- Workers needed to support electric vehicle charging stations and electricity distribution systems that support them

Natural and propane gas workers in

- Workers who maintain, ensure, or restore the compression, storage, transmission, and distribution of natural gas, including call centres, utility workers, reliability engineers and fleet maintenance technicians, etc.
- Workers required to carry out construction and restoration projects and services associated with the natural gas sector, including for the storage, compression, transmission and distribution of natural gas
- Workers at compressor stations, underground storage facilities for natural gas, natural gas processing plants, those that deal with natural gas liquids, Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) facilities
- Workers involved in drilling, production, processing, refining, and transporting natural gas for use as end-use fuels, feed stocks for chemical manufacturing, or use in electricity generation
- Workers as needed for all system operations upstream, midstream and downstream
- IT and OT technology staff – for EMS (Energy Management Systems) and Supervisory Control and Data Acquisition (SCADA) systems, and utility data centres; cybersecurity engineers; cybersecurity risk management
- Vegetation management crews and traffic workers who support
- Environmental remediation/monitoring technicians
- Instrumentation, protection, and control technicians
- Workers needed to support natural gas vehicle refuelling stations and the natural gas systems that support them
- Propane gas dispatch and control rooms and emergency response and customer emergencies, including propane leak calls

- Propane gas service maintenance and restoration, including call centres
- Processing, refining, and transporting natural liquids, including propane gas, for use as end-use fuels or feed stocks for chemical manufacturing
- Propane gas storage, transmission, and distribution centres
- Construction and restoration projects and services associated with the safe and reliable operations of propane gas services, including the sector supply chain, contractors and subcontractors

Petroleum workers in

- Petroleum product storage, pipeline, marine transport, terminals, rail transport, road transport
- Crude oil storage facilities, pipeline, and marine transport
- Petroleum refinery facilities
- Petroleum security operations centre employees and workers who support emergency response services
- Petroleum operations control rooms/centres
- Petroleum drilling, extraction, production, processing, refining, terminal operations, transporting, and retail for use as end-use fuels or feed stocks for chemical manufacturing
- Onshore and offshore operations for integrity, maintenance and emergency response
- Retail fuel centres such as gas stations and truck stops, and the distribution systems that support them
- Support to oil spills and other hazardous material response and cleanup, and those who supply the equipment necessary for the response and clean-ups
- Construction and restoration projects and services associated with the safe and reliable operations of petroleum services and associated environmental rehabilitation projects, including the sector supply chain, contractors and subcontractors

Transportation

Essential transportation workers are defined as workers supporting or enabling transportation functions in any transportation mode (i.e. road, air, rail, marine), in support of the continued essential movement of goods and people, in circumstances where non-essential travel is restricted. For greater clarity, this includes but is not limited to:

- Truck transportation employees, including drivers, dispatchers, maintenance and repair technicians, warehouse workers, truck stop and commercial vehicle inspection station workers, rest area workers, and workers that maintain and inspect critical infrastructure (including those that require cross-border travel)
- Employees of firms and shipping facilities providing administrative and support services that enable logistics operations, including distribution, cooling, storing, packaging, and distributing products for wholesale or retail sale or use
- Workers responsible for inspecting rail transport infrastructure, controlling rail traffic, and rail operating equipment
- Workers responsible for operating dispatching passenger, commuter and freight trains and maintaining rail infrastructure and equipment
- Maritime transportation workers, including those in the commercial shipping sector who ensure the continuity of operations and the fluidity of commercial shipping, such as vessel crew, port workers, mariners, equipment operators, longshoremen, sailors, marine pilots, marine agents, representatives of foreign ship owners, maintenance workers, tug captains, and others
- Truck drivers, and conductors of other conveyances, involved in the transportation of essential goods and materials, and supporting infrastructure, capabilities, functions, and services
- Transportation workers in support of any emergency response
- Transportation service providers, including drivers, conducting transportation services necessary for activities of daily living (e.g. taxis, other private transportation providers, couriers)
- Workers in organizations that provide transportation services to businesses and individuals, including by air, water, road, and rail, including providing logistical support, distribution services, warehousing and storage, including truck stops and tow operators
- Transportation workers involved in construction work and necessary supporting services
- Workers in organizations that provide materials and services for the operation, maintenance and safety of the transportation system, such as clearing snow, collision response, and completing needed repairs to the transportation system (e.g. road repairs)
- Automotive and heavy vehicle repair and maintenance workers
- Postal and shipping workers, to include private companies
- Those working for distributors (to include service centres and related operations) of packaging materials, pallets, crates, containers, and other supplies needed to support manufacturing, packaging staging and distribution operations
- Tow truck and vehicle rental workers

- Employees who repair and maintain vehicles, aircraft, rail equipment, marine vessels, and the equipment and infrastructure that enables operations that encompass movement of cargo and passengers
- Air transportation employees, including pilots, flight attendants and flight crew, air traffic controllers, ramp personnel, aviation security, and aviation management
- Workers who support the maintenance and operation of cargo by air transportation, including flight crews, maintenance, airport operations, and other on-and off-airport facilities workers
- Public/mass transportation workers, including those with maintenance, operations, and dispatch responsibilities

Manufacturing

- Workers from the upstream supply chain for essential services needed to support critical infrastructure
- Workers necessary for the manufacturing of inputs, materials and products needed for medical devices and drug supply chains, transportation, shipping, energy, communications, aerospace, shipbuilding, food and agriculture, chemical manufacturing, nuclear facilities, sanitation, water and wastewater treatment, banknotes, emergency services and defence and security
- Workers who support the metals distribution supply chain, including metal manufacturing, metal-casting, parts, and machining
- Workers who support the manufacture and distribution of forestry products, including, but not limited to timber, paper, and other wood products
- Workers necessary for manufacturing, maintenance, and servicing in the defense and aerospace sectors
- Aircraft and ship Maintenance, Repair and Overhaul (MRO), including refuelling as well as routine maintenance
- Primary metal producers (e.g. steel and aluminum)
- Workers in mining and forestry, including workers on abandoned mines
- Workers necessary for the manufacturing of materials and products needed for the oil and gas sector
- Businesses that ensure global continuity of supply of mining and mineral materials and products, and that support supply chains in Canada, including: mining operations (mines and quarries) and metallurgical operations (smelters, refiners and recyclers); mineral exploration and development; mining supply and services that support supply chains in the mining industry including maintenance of operations, health and safety

Finance

- Workers who are needed to support financial transactions, advice, and services (e.g., banknote processing, payment, clearing, and settlement; wholesale funding; insurance services; benefit, compensation and pension services, wealth management; and capital markets activities)
- Workers who are needed to provide consumer and business access to banking and lending services (e.g. bank branches, ATMs, customer call centres, facilities management, and to move currency and payments (e.g., armored cash carriers)
- Workers who are needed to provide pension services and employee benefits services
- Workers who support financial operations, such as those staffing processing data and security operations centres and other control functions
- Workers and suppliers of information and communication technology, legal services, and other services, enabling the delivery of essential financial services named above

Safety

- Personnel in emergency management, law enforcement, Emergency Management Systems, fire, and corrections, including front line, management and essential support staff
- Workers who ensure the provision of Search and Rescue services, including those needed to coordinate and conduct search and rescue missions and communicate with those in distress
- Emergency Medical Technicians
- 911 call centre employees
- Hazardous material responders from government and the private sector
- Workers who maintain digital systems infrastructure supporting law enforcement and emergency service operations
- Workers managing medical waste
- Workers managing waste from pharmaceuticals and medical material production
- Workers at laboratories processing test kits
- Workers who support hazardous materials response and cleanup

- Workers who maintain digital systems infrastructure supporting hazardous materials management operations

Government

- Any service or activity whose disruption would result in a high or very high degree of injury to the health, safety, security, or economic well-being of Canadians or to the effective functioning of the government of Canada
- Workers involved in the creation, translation and publication of public notices, regulation, legislation, public service announcements or advertisement to ensure the dissemination of essential public information or to ensure the continuity of government
- Workers supporting ePassport, permanent residency, facial recognition, visas, Vital Statistics, Provincial or Territorial Identity card programs (e.g., drivers' licenses)
- Workers who support the operation, inspection, and maintenance of essential public works facilities and operations, including dams, bridges, heating and cooling plants, water and sewer main breaks, fleet maintenance personnel, construction of critical or strategic infrastructure, structural engineering, geomatics, custodial health and safety requirements, environmental compliance, integrity of underground infrastructure, management of non-hazardous solid waste, traffic signal maintenance, emergency location services for buried utilities, maintenance of digital systems infrastructure supporting public works operations, and other emergent issues
- Workers who are critical to protect the health and well-being of individuals who participate in transportation; promote safety and efficiency in transportation; protect the environment from transportation-related pollution events
- Workers who support necessary functions to manage critical marine transportation and activity, including fishing activities and aquaculture operations required to maintain food supply
- Support workers for road and line clearing, and to ensure the availability of needed facilities, transportation, energy and communications networks
- Workers to ensure continuity of government property and building management
- Workers who provide temporary emergency government accommodations
- Security staff to maintain building access control and physical security measures
- Elections personnel
- Federal, provincial, territorial and municipal employees who support essential functions, support systems and services, and communications networks
- Federal, provincial, territorial and municipal employees who support the policy, program and operational systems and services needed to ensure the business continuity of government and the economic security of Canadians
- Trade Officials (FTA negotiators; international data flow administrators)
- Meteorological services
- Workers that maintain digital systems infrastructure supporting other critical government operations
- Workers at operations centres necessary to maintain other essential functions, such as income support
- Workers who support necessary credentialing, vetting and licensing operations for transportation workers
- Border and customs workers who are critical to facilitating trade in support of critical supply chain
- Workers that regulate and inspect products and businesses
- Members of the Canadian Armed Forces and employees of the Department of National Defence who are supporting operations or conducting critical activities
- Individuals employed in the Canadian Defence Industrial Base who support the essential services required to meet national security commitments to include but are not limited to, aerospace; mechanical and software engineers, manufacturing/production workers; IT support; security staff; security personnel, intelligence support, aircraft and weapon system engineers, mechanics and maintainers
- Personnel working for companies and their subcontractors, who perform under contract to Canada for the provision of materials and services for the Department of National Defence
- Personnel who support the development, production, testing, fielding or sustaining of our military weapon systems/software systems, or the infrastructure to support those activities

Other Services

- Workers such as plumbers, electricians, exterminators, escalator and elevator mechanics, home appliance service providers, and others necessary for maintaining the safety, sanitation, and essential operation of residences and buildings
- Workers who support the supply chain of building materials from production through application/installation, including cabinetry, fixtures, doors, cement, hardware, plumbing, electrical, heating/cooling, refrigeration, appliances, paint/coatings, and employees who provide services that enable repair materials and equipment for essential functions

- Workers supporting ecommerce through distribution, warehouse, call centre facilities, and other essential operational support functions
- Workers distributing, servicing, repairing, installing residential and commercial HVAC systems, boilers, furnaces and other heating, cooling, refrigeration, and ventilation equipment
- Workers who support the appliances supply chain, including manufacturing, wholesale distribution, retail, and repair
- Educators supporting public and private K-12 schools, colleges, and universities for purposes of facilitating distance learning or performing other essential functions, if operating under guidelines for social distancing
- Hotel Workers where hotels are used for COVID-19 mitigation and containment measure
- Care and maintenance of contaminated sites
- Waste and Garbage collectors and processors (compost, garbage and recycling)
- Child care services for essential workers, and home child care services of less than six children
- Mental Health services, including for Indigenous and isolated communities (e.g. health and wellness lines)
- Professional and other services that support lawmakers and the court system to ensure individuals have access to justice where critical interests are at stake
- Those whose services are necessary to conduct hearings and ensure orders of an independent judiciary are enforced, including but not limited to: the administration of justice; criminal law; family law; and courts (e.g., prosecutors, legal aid and duty counsel, defence counsel or their representatives, sheriffs, court staff and victim support services)
- Probation Officers
- Veterinarians, veterinary technicians and necessary support staff
- Workers essential for assistance programs and government payments
- Workers supporting settlement and resettlement programs for newcomers
- Janitorial and cleaning services, including dry cleaners, laundry service providers, laundromats
- Health and welfare of animals, including boarding kennels, stables, animal shelters, zoos, aquariums, research facilities and other service providers
- Businesses that supply office products and services, including providing computer products and related repair and maintenance services, for individuals working from home and for essential businesses
- Workers needed to operate hotels, motels, shared rental units and similar facilities, including student residences
- Businesses that provide products and services that support research activities
- Land registration services, real estate agent services, home inspection services, and moving services
- Workers necessary to providing freight forwarding and customs brokerage services

If you are looking to determine if a specific job or service is deemed essential, please contact your provincial or territorial government, as they, not the federal government, have the legislative authority to determine what is or is not considered essential in their jurisdiction. Dear Sir or Madam:

RE: TAKLA, Pierre
Application for a Canadian Work Permit

This letter is written in support of Mr. Pierre Takla's request for a Canadian Work Permit.

Google is a global technology leader, focused on improving ways people connect with information. Google's innovations in web search and advertising have made our website a top Internet property and our brand one of the most recognized in the world. For more information, please visit www.google.ca.

Our Global Mobility Program

Each year, hundreds of Googlers will rotate to new teams. Google offers its employees experiential rotational career development opportunities in different roles, functions and/or geographies. They will apply their skills to grow Google's business, and in turn develop new skills and experiences to propel their careers forward.

With more than 70 offices in over 50 countries around the world, including but not limited to Canada, United States, Brazil, Mexico, United Kingdom, Germany, India, China, South Africa, our company's mobility practice is robust and multifaceted. We offer employees rewarding and wide-ranging experiences and opportunities to pursue their passion. Our global mobility objectives aim to afford employees the ability to share knowledge and best practices between our locations. We take pride in hiring incredibly talented people who grow with Google. We want all Googlers to feel supported and encouraged to develop challenging and fulfilling careers.

Google has a history of transferring professionals to and from Canada to other locations worldwide to provide our employees with training and international experience. Please see the attached letter detailing the number of permanent and temporary transfers in and out of Canada over the last 5 years.

The number of employees has steadily grown through continual expansion of our company. Google has had significant success with our global mobility initiatives, which has played an important role in strengthening and growing our global footprint.

The Role in Canada

We wish to confirm that Mr. Takla has been selected to commence his career with Google Canada with a three-year placement in Montreal, Quebec in the role of Software Developer starting from April 1, 2022. This experience will be beneficial to Mr. Takla's career development and path, as he will learn from his Canadian colleagues about best practices developed here.

Google is and always will be an engineering company. At Google, engineers not only revolutionize search, they routinely work on massive scalability and storage solutions, large-scale applications and entirely new platforms for developers around the world. From Google Ads to Chrome, Android to YouTube, Social to Local, Google engineers are changing the world one technological achievement after another.

Google's software engineers develop the next-generation technologies that change how billions of users connect, explore, and interact with information and one another. Our products need to handle information at a massive scale and extend well beyond web search. We're looking for engineers who bring fresh ideas from all areas, including information retrieval, distributed computing, large-scale system design, networking and data storage, security, artificial intelligence, natural language processing, UI design and mobile; the list goes on and is growing every day. As a Software Developer, Mr. Takla will work on a specific project critical to Google's needs with opportunities to switch teams and projects as he and our fast-paced business grow and evolve. We need our engineers to be versatile, display leadership qualities and be enthusiastic to take on new problems across the full stack as we continue to push technology forward.

As a Software Developer, Mr. Takla's specific responsibilities vary by project area, including designing, developing, modifying, and/or testing software needed for various Google projects. Software Engineers have a penchant for solving complex and interesting problems. Pushing the boundaries of current mobile platforms, Mr. Takla will perform technological feats under constrained environments and will be presented with exciting challenges in native or mobile application development. In general, Mr. Takla's duties will include, but are not limited to the following:

- Designing, developing, testing, deploying, maintaining, and improving software; and
- Managing individual project priorities, deadlines, and deliverables.

The Applicant

Mr. Takla is qualified for this position based on his academic background and professional experience obtained to date. Mr. Takla holds a Master of Science in Computer Sciences from École Nationale Supérieure D'informatique et de Mathématiques Appliquées de Grenoble (Ensimag), located in Saint-Martin-d'Hères, France.

Mr. Takla possesses extensive professional experience as a Software Engineer. He has been employed as a Software Engineer at Google Switzerland GmbH, since April 2019, in the Zurich, Switzerland office. Here, he is responsible for developing the enterprise products and ensuring customer satisfaction and protecting websites from bots and from malware. Prior to this, he worked as a Software Engineer at Criteo where he used programs and languages such as a C#, Scala, Python, to complete projects.

As a result of his extensive professional experience, Mr. Takla is proficient in the following programming languages and software: C++, C, Python, C#, Java, SQL, etc.

For further information on Mr. Takla's experience and qualifications, please refer to the enclosed resume.

Terms of the Contract

While in Canada, Mr. Takla will be paid a base salary of CAD \$130,000.00 annually by Google Canada. Mr. Takla is eligible for reimbursement for specified moving expenses. In addition, Mr. Takla is eligible to participate in the company discretionary bonus plan with the annual bonus target of 15.0% of his base salary and is eligible for a promotion or salary increase. Mr. Takla will also be eligible to participate in Google's company benefits package, which includes extended medical, dental, disability, and life insurance and be eligible for 20 days of paid vacation. He is eligible to participate in certain Google Benefit programs offered to similarly situated Google employees in accordance with the terms of Google's policies and benefit plans.

Our Request

We respectfully request your assistance in issuing a work permit to Mr. Takla so that he may participate in this professional development opportunity with our company in Canada.

Should you have any questions or concerns, please contact the undersigned, or our solicitor in this matter, Ms. Elizabeth Hazboun, at de Lint LLP in Montreal, Quebec, via phone: (514) 390-2131, or via e-mail: ehazboun@dgilaw.com.

Yours truly,

Jill Murdock

Mobility Operations Specialist – HR Operations, AMS

Tel.: 650-203-7095

jmurdock@google.com

Education

- **Ensimag** (French Superior National School of Applied Mathematics and Computer Science), MS, Computer sciences, **images**, **virtual reality** and **multimedia**, 2012
- Universidad Politécnica de Madrid Erasmus, **computer vision & machine learning** 2012

Languages

- French : Native
- English: Fluent (TOEIC 935)
- Spanish: Advanced (C1 certificate)

Skills summary

- Machine Learning, Scalability, Multithreading, 3D
- C++, C, Python, C#, Java, OpenGL/ES, QT, SQL, assembly languages

Professional experience

- **Google**, April 2019 - Now (C++, python)
reCAPTCHA engineer: protecting website from bots. Developing the Enterprise products and ensuring customer satisfaction.
Google Antivirus engineer: protecting Gmail, Drive and more Google products from malware.
- **Criteo**, April 2017 – April 2019 (C#, Scala, Python, MapReduce, Spark, HDFS, Hive, ML, Tensorflow)
- **Capitaine Train**, January 2017 - March 2017 (Ruby, Android/iOS)
Add several features (e.g. possibility to buy/use TGVMax card) by interfacing to railway companies of different countries.
- **Misys**, April 2014 – January 2017
High performance multithreading application for financial software (C++, C#)

Responsible for the connectivity between financial providers (Bloomberg, Reuters ...) and our software.
- **Leipzig Uni**, Nov 2013 – Feb 2014: C++, Machine Learning, Image processing

Virtual 2D/3D images analysis and mathematical modeling during expansion of stem cells and hepatic differentiation in bio artificial liver modular devices.
- **Amadeus**, Jun 2013 – Oct 2013
Cache optimization, Scalability (Python, SQLite, Hadoop)

Improved cache result accuracy and speed by improving the algorithm detecting which data needs to be recalculated. Also adapted some algorithms to the mapreduce logic in

order to scale up.

- **Silicon Studio** (Japan), Feb 2012 – Jul 2012
Facial expression recognition (Android, Machine Learning, multithreading C++, 3D tracking)
During this internship I studied the state of the art in facial emotion recognition, analysed the feasibility and created from scratch a ML based working prototype which recognizes facial emotions in real-time from a video stream with a high success rate.
- Grenoble Informatics Laboratory: Jun – Nov 2011: Automatic generation of natural language (Java, UML)
During this internship I Adapted SimpleNLG (an API for the natural language generation of English text) to French
- Systor Vest, 2010: 3 months traineeship at Systor Vest in Norway
Development of a voice activity detection tool (C#)
- Actoll, 2009: 3 months internship
Development of web services (Java, JSP, SQL, AJAX, Eclipse, unit-tests)
Nagios (open source monitoring software) software modification to meet customers' needs (C, C++)

School projects

- 2.5D Cartoon Models (C++, OpenGL, QT, non-photorealistic rendering)
Developed from scratch a software creating a full animated 3D cartoon character model from three 2D drawings
- Stereoscopy (3-D imaging): 3D scene reconstruction from two 2D pictures (Python)
- Animated 3D scene rendering: underwater scene (C++, OpenGL)
Modeling octopus, fishes, deep sea diver, fog, dust, bubbles, rope, etc.
- Inpainting (C++): Restoration of digital degraded images
- Development of an innovative GUI for inventory management software (Java, Android)
- Zero-default Java Compiler: manager and programmer (4 people, 1 month full-time)

Extra-curricular

- Former member of the Ensimag Students' Union and the Ensimag Sportive Union
Within a team of 20 people, I organized different social activities for the students.
I coordinated a sport tournament between universities of 8 cities, all around France.
- Former manager of the Ensimag cafeteria: preparation of more than 70 meals a day for other students (having 3 other students under my responsibility)
- Hobbies : Travelling, Climbing, Volleyball
- Programming contest: MDF 2018, ranked 5th in my programming language, 28th overall
- Teaching: 'J'apprends a Coder', teacher in order to help teenage discover computer sciences
- Mentoring on Openclassrooms: help people to become Data architect

MINISTERE DE L'ENSEIGNEMENT SUPERIEUR ET DE LA RECHERCHE
